STAT FROM:

Liaison Division
Office of Legislative Liaison

SUBJECT: Introduced Legislation

1. Attached for your information and analysis are four bills, recently introduced in the House. Respectively, they address the following issues:

H.R. 5066 would reform the merit pay system by providing for a performance management and recognition system for certain federal employees, would require the establishment of performance appraisal systems for employees covered by the performance management and recognition system, and would increase flexibility in the management of senior executives (introduced by Mr. Wolf, R,VA). Please pay close attention to this bill and advise me of your concerns, comments, and the like;

H.R. 5106 would amend Title II of the Social Security Act to eliminate the disparity between the benefits payable to individuals who retired in or after 1979 and the benefits payable to individuals similarly situated who retired before that year, by providing that the benefits payable to the former individuals may never be less than those payable to the latter;

H.R. 5110 would amend Title II of the Social Security Act to provide that a monthly insurance benefit thereunder shall be paid for the month in which the recipient dies and that such benefit shall be payable for such month only to the extent proportionate to the number of days in such month preceding the date of the recipient's death; and

H.R. 5133 would terminate the Senior Executive Services unless it is continued by an enactment of the Congress.

2. While it is uncertain that any of the above will succeed to enactment, this office will nonetheless follow them and report their progress to you accordingly.
